

FIREANTS

THE GLOBAL CRYPTOCURRENCY

Whitepaper

FireANTS is a fair and open peer-to-peer blockchain system to support sovereignty for everyone by providing an autonomous financial and data management system that is based on mathematics instead of trust.

FIREANTS CRYPTO, INC.

2 Introduction – FireANTS are little helpers!

The invention of the Bitcoin protocol has opened the door to new forms of financial interactions. One such form is the adaption of blockchain technologies for the use as a social currency. FireAnts which is a form of money created by the FireANTS Crypto, Inc. to serve the economic and social interests of people. FireANTS shall keep people active by combining blockchain technologies with humanitarian and socio-economic challenges. This project strives to support sovereignty to individuals by providing an automomous financial data management and government system that is based on mathematics instead of trust.

Vulnerabilities are, in most cases, amenable to technological mitigations that must be adaptable to both community values and changing conditions, emphasizing the need for careful design. FireANTS Crypto, Inc. and its developers are taking care of the state of the art design of the FireANTS blockchain. It is about creating a sense of community and by that a strong affiliation between customers, consumers and users. FireANTS increases engagement with consumers and interaction with customers, and by that adding to the customer conversation around the FireANTS, it grants access to information and knowledge, which is being shared within the community. FireANTS is also a platform for developers to create applications for the preservation of endangered cultures. Languages, cultures, and traditions can be preserved on the FireANTS blockchain. With the help of FireAnts, legacies can be recorded for eternity. In addition, archaeological finds or specific items can be tagged, digitized, monetized and displayed in a virtual world.

With no repository or single administrator, and since all the code used for its own functionality is open source, the FireANTS blockchain is considered a decentralized system. FireANTS Crypto, Inc. donates its coins and tokens to philanthropic projects that aim to increase fairness and justice in human society. Among other things, the focus is on the sovereignty of minorities and oppressed cultures that are dependent on centralized and inflationary systems.

FireAnts started as ERC-20 token on the Ethereum blockchain and developed their own native FireAnts blockchain based on the Scrypt (Litecoin) algorithm. The ERC-20 token can be burnt and claimed as BEP-20 token on the Binance Smart Chain.

3 FireANTS Crypto Inc.

FireANTS Crypto Inc. is a Delaware C-Corporation, with a foreign corporation registered in Nevada, that spreads awareness on how to behave securely in a more and more digitized world.

Philanthropy and cybersecurity are some of the most important keypoints. The Company plans to launch its new headquarters in Las Vegas, Nevada. The Las Vegas location is for marketing purposes to conveniently access the myriad trade show activities.

Next to the United States, FireANTS Crypto, Inc. developers are located all over the world. Different development headquarters are located in South Africa, Puerto Rico, Netherlands, Germany and Switzerland which offers one of the worlds best statutory regulated environments for cryptocurrencies and digital assets.

FireANTS Crypto, Inc. serves as donation aggregator, whereby the coins and tokens of FireANTS Crypto, Inc. are donated to the various scientific projects of the FireANTS directors board of advisors, allowing them to generate funds for their projects, to bring them faster to completion and success. This covers humanitarian-, social-, or sustainability work, as well as cybersecurity projects and blockchain programming. 25% of the FireANTS coin total supply, which is 210 million, have been premined by the company. A large amount of the premined coins is reserved for the donations and for donation aggregation by staking, the staking rewards will be regularly donated to the directors board of advisors.

In a subsequent process, the FireAnts blockchain will move from proof of work to an environmental friendly proof of stake consensus that allows the owners of the ANTS coin to create masternodes which enable to earn ANTS coin as validator on the network. The masternode concept allows the implementation of a data layer to the network, enabling the creation of smart contracts, voting systems and non-fungible tokens.

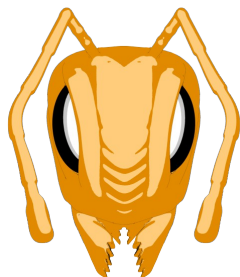

While the FireAnts blockchain is in its proof of work mining and distribution epoch, FireANTS Crypto, Inc. is actively mining ANTS coin and adds these coins to the donation aggregator wallet, to permanently increase the amount of ANTS coins available for donations.

FireANTS Crypto, Inc. is taking care of marketing and merchandise, to accelerate FireANTS as a brand and decentralized status symbol into public awareness. FireANTS developers and members of the FireANTS community will maintain the network until this becomes fully decentralized system.

4 Overview FireANTS Ecosystem

The FireANTS ecosystem consists of:

- the native FireANTS coin [ANTS],
- wrappedFireANTS BEP-20 token [wANTS] which reflects the FireANTS coin on the Binance Smart Chain,
- the redFireANTS BEP-20 token [rANTS], and
- the FireAnts ERC-20 token [ANTS].

5 FireANTS Coin, the Native Blockchain [ANTS]

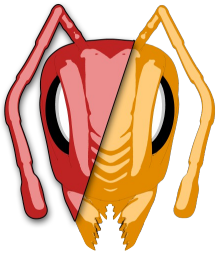

One year after the creation of ANTS ERC-20 token on the Ethereum blockchain, FireANTS Crypto Inc. has developed their own blockchain system using the ANTS coin as native currency. To enable interaction between ANTS coin and rANTS BEP-20 token on the Binance Smart Chain, the ANTS coin can be wrapped 1 : 1 to the Binance Smart Chain.

~ 210,000,000 ANTS coin will ever be created and this cannot be altered due to the code programmed into the blockchain.

25% of the total ANTS supply has been premined. These premined coins are used by the FireANTS Crypto Inc. for donation aggregation and blockchain development.

16.5% of the total supply of ANTS coin can be mined using the Scrypt (Litecoin) algorithm, and the other 58.5% ANTS coin will be minted by staking in wallets and masternodes. The block time for the generation of each block is approx. 3 min.

Algorithm	Scrypt, 50% PoW & 50% PoS
Coin name	FireAnts
Coin abbreviation	ANTS
Public address letter	A - B
Block reward (PoW)	100
Last PoW block:	691200
Block reward (PoS)	100
Min. stake age	6 hours
Blocktime	3 min

6 Wrapped FireANTS [wANTS]

Smart Contract: [0xcD845749201E07c678563bc5Ef7534c85550d496](https://bscscan.com/address/0xcD845749201E07c678563bc5Ef7534c85550d496)

How to wrap FireAnts coin to BinanceSmartChain?

Go to: [wrapping.services](#)

Ensure the setting is: Swap ANTS to wANTS

Enter the amount of FireAnts coin you want to wrap

Enter your BSC address

Enter your e-mail address (optional)

Click on "swap"

Send the amount of ANTS coin to the address shown

(FireAnts coin address start with A or B)

The wrapping service can take up to 30 min Check out: bscscan.com

The amount of FireAnts coin wrapped will be minted as BEP-20 token and send to your BSC address.

How to unwrap wrappedFireAnts [wANTS] back to FireANTS chain?

Go to: [wrapping.services](#)

Ensure the setting is: Swap wANTS to ANTS

Enter the amount of wrapped FireAnts token you want to unwrap

Enter your ANTS address

Enter your e-mail address (optional)

Click on "swap"

Send the amount of wANTS token to the address shown

(This will be a BSC address)

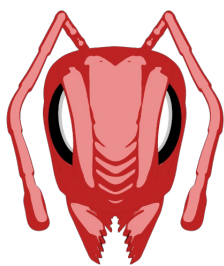

The sent amount of wrapped FireAnts token will be burnt in the smart contract, and send as ANTS coin to your FireANTS address.

Check out: [explorer.fireants](#)

The wrapping service for the ANTS coin is provided by the Team of Monetaryunit. Wrapped FireANTS token can be used for staking in a DeFi pool, or for yield farming by staking the LP-tokens in a yield farm, received by provision of liquidity on the BinanceSmartChain.

What to do if the wANTS are not visible in my wallet?

Add the [smart contract](#) to your wallet (Symbol [wANTS]; Decimals: 18)

7 red FireANTS [rANTS]

Smart Contract: [0x567bbef0efdf53355c569b7aedde4c4f7c008014](https://bscscan.com/address/0x567bbef0efdf53355c569b7aedde4c4f7c008014)

While the FireANTS coin is scarce and mined like bitcoin and therefore considered as a store of value, the redFireANTS token serves as the main payment currency in the FireANTS ecosystem. Due to amount, value and cheap transaction costs of red FireANTS token, rANTS is ideal for micropayments and everyday monetary transactions.

Token Name	redFireANTS
Token Symbol	rANTS
Total Supply	21,000,000,000,000
Date of creation	Oct-04-2021 09:30:24 PM +UTC

What to do if the rANTS are not visible in my wallet?

Add the [smart contract](#) to your wallet (Symbol [rANTS]; Decimals: 18)

The ratio between rANTS BEP-20 token to ANTS coin is 100,000 : 1, meaning that one ANTS coin reflects 100,000 rANTS BEP-20 tokens.

Users are able to swap between ANTS coin and rANTS BEP-20 tokens. In addition, the ANTS coin can be 1 : 1 wrapped to wANTS BEP-20 to the Binance Smart Chain, allowing access to DeFi applications, such as yield farming, liquidity mining and many other applications provided by the Binance Smart Chain.

Due to high gas fees for transactions on the Ethereum blockchain, low volume transactions are not suitable for when using ERC20-token for everyday transactions, here the Binance Smart Chain offers a cost saving solution to participate in the DeFi space.

To allow the ANTS ERC-20 token to move to Binance Smart Chain users can claim rANTS BEP-20 token or ANTS coin by sending their [ANTS-ERC20 token](#) to the creator address.

8 Mining on the FireANTS Native Blockchain

In 2025, the proof of work phase will end at block 691200 and the FireAnts blockchain will move completely to the more environmental friendly Proof of Stake consensus. At this point, masternodes can be implemented when the change from the proof of work to proof of stake has happened.

This way it can be ensured that the power consumption of the FireANTS network can be kept at an environmental friendly level.

Unlike bitcoin, the blockreward reduction cycles (also known as halving) on the FireAnts blockchain happens every 24 month. This reduction follows its unique pattern and enables a steady state condition at a supply of ~210,000,000 ANTS coin. This amount will never be exceeded!

Starting with a block reward of 100 ANTS coin per block, whereby the blocks are randomly with 50/50% probability are distributed between miners and staking wallets. The first blockreward reduction will take place at block 345'600, then the supply of the blockreward is reduced to 40 ANTS coins.

The second blockreward reduction at block 691200 will reduce the blockreward to 30 ANTS coin per block.

In this phase the FireANTS blockchain will undergo the transition to a new epoch, the blockchain completely leaves the proof of work consensus and moves to full proof of stake with masternodes consensus. The FireANTS blockchain then allows the creation of masternodes for ANTS coin holders, and a data layer is integrated that allows the creation of smart contracts directly on the FireANTS blockchain.

The 3rd reduction will generate 20 ANTS coin per block.

The 4th reduction will generate 10 ANTS coin per block.

The 5th reduction will generate 5 ANTS coin per block.

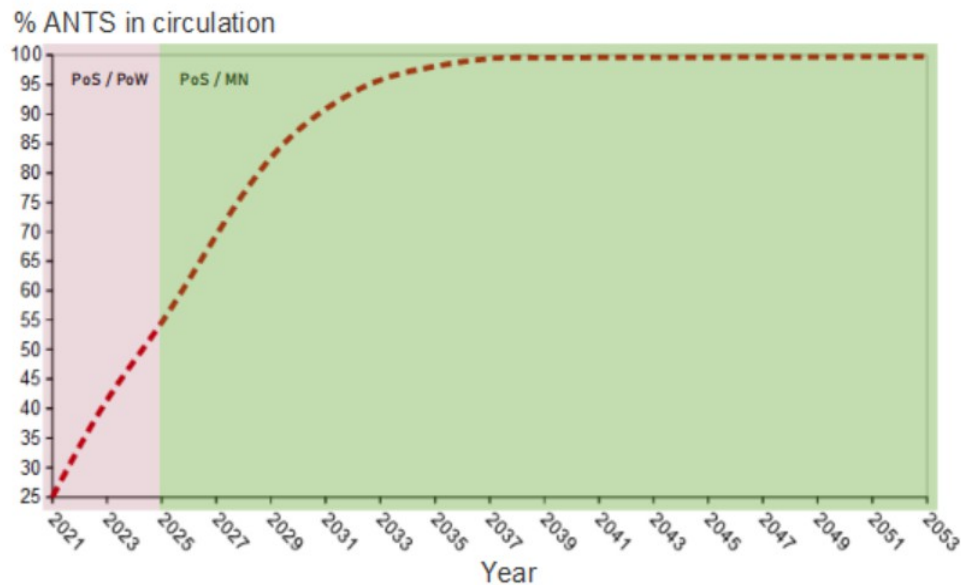

The 6th reduction will generate 2 ANTS coin per block.

The 7th reduction will generate 1 ANTS coin per block.

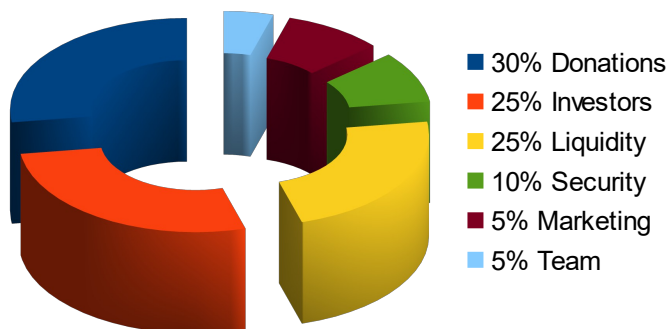

The 8th and last blockreward reduction will generate 0.1 ANTS coin per block. From this point on, the blockreward will remain permanently at 0.1 ANTS coin per block, and will be no longer reduced.

Due to the transaction fees burnt in the proof of stake consensus, the supply of the FireANTS coin will reach an equilibrium of ~210,000,000 ANTS coin in the year 2057.

9 FireANTS Coin release curve

10 FireANTS Coin Distribution

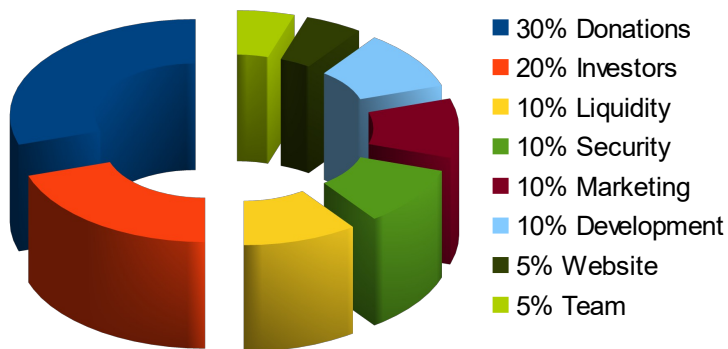

30% of the premined ANTS coin supply is reserved for donations and 25% of the premined ANTS coin supply is reserved for investors.

25% of the premined ANTS coins are used as liquidity to generate staking rewards in the donation aggregator wallet, the staking rewards will be regularly donated to the directors board of advisors projects.

10% of the premined ANTS coins will be used to secure the FireANTS network using state of the art technologies.

5% of the premined ANTS coins is used for marketing, these ANTS coin will be distributed by tip-bots for airdrops, faucets and will be given away on charity events and 5% of the premined ANTS coins will be used for the FireAnts team development.

11 redFireANTS Token Distribution

30% of the rANTS token supply is reserved for donations to the directors board of advisors to support their projects as well as donations in case of devastating events like natural disasters or similar.

20% of the rANTS token supply is reserved for investors.

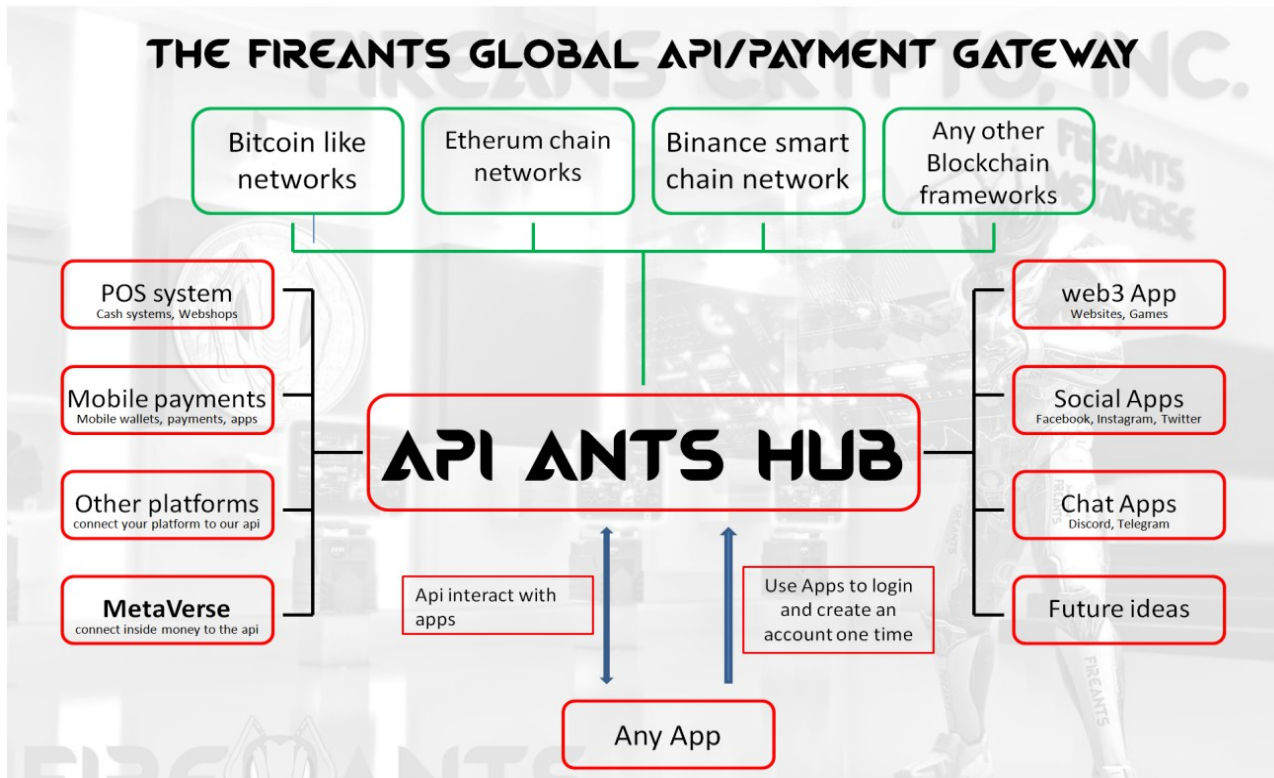

10% of the rANTS token supply is used to secure the FireANTS network.

10% of the rANTS token supply is used for marketing, the redFireAnts token will be distributed by tip-bots for airdrops, faucets and will be given away on charity events.

10% of the rANTS token supply is reserved for FireAnts blockchain development.

5% of the rANTS token supply will be used for website development and 5% for servers and hardware for the support of the FireAnts team.

12 FireANTS Crypto Inc. global API gateway

The ANTS-API-HUB, respectively "AAH," allows fast and easy integration of decentralized blockchain networks, such as Bitcoin, Ethereum, Binance Smart Chain, and other blockchain frameworks.

The AAH connects virtual worlds and decentralized applications to the real world. The AAH can integrate mobile payment systems, mobile wallets, and similar applications.

Point of sales (POS) systems, such as cash apps and webshops, can utilize AAH to accept and handle cryptocurrency payments easily. Platforms, like social media apps (Twitter, Facebook) or chat platforms (Discord, Telegram), as well as web3 applications (Games, Websites, Dapps) can be connected to the AAH-system by API integration.

Authorized applications can register with an account on the AAH. Every authorized platform can interact with AAH, where data exchanges securely and fast.

The ANTS-API-HUB serves as a gateway to the FireANTS metaverse and connects currencies used in the virtual world to the API.

13 FireANTS Crypto Inc. NFTs

FireANTS NFT's can be found in 12 different colors, whereby each color has its associate specific properties. The colors can be separated in two different main groups, the regular colors and the special colors.

8 x regular colors:

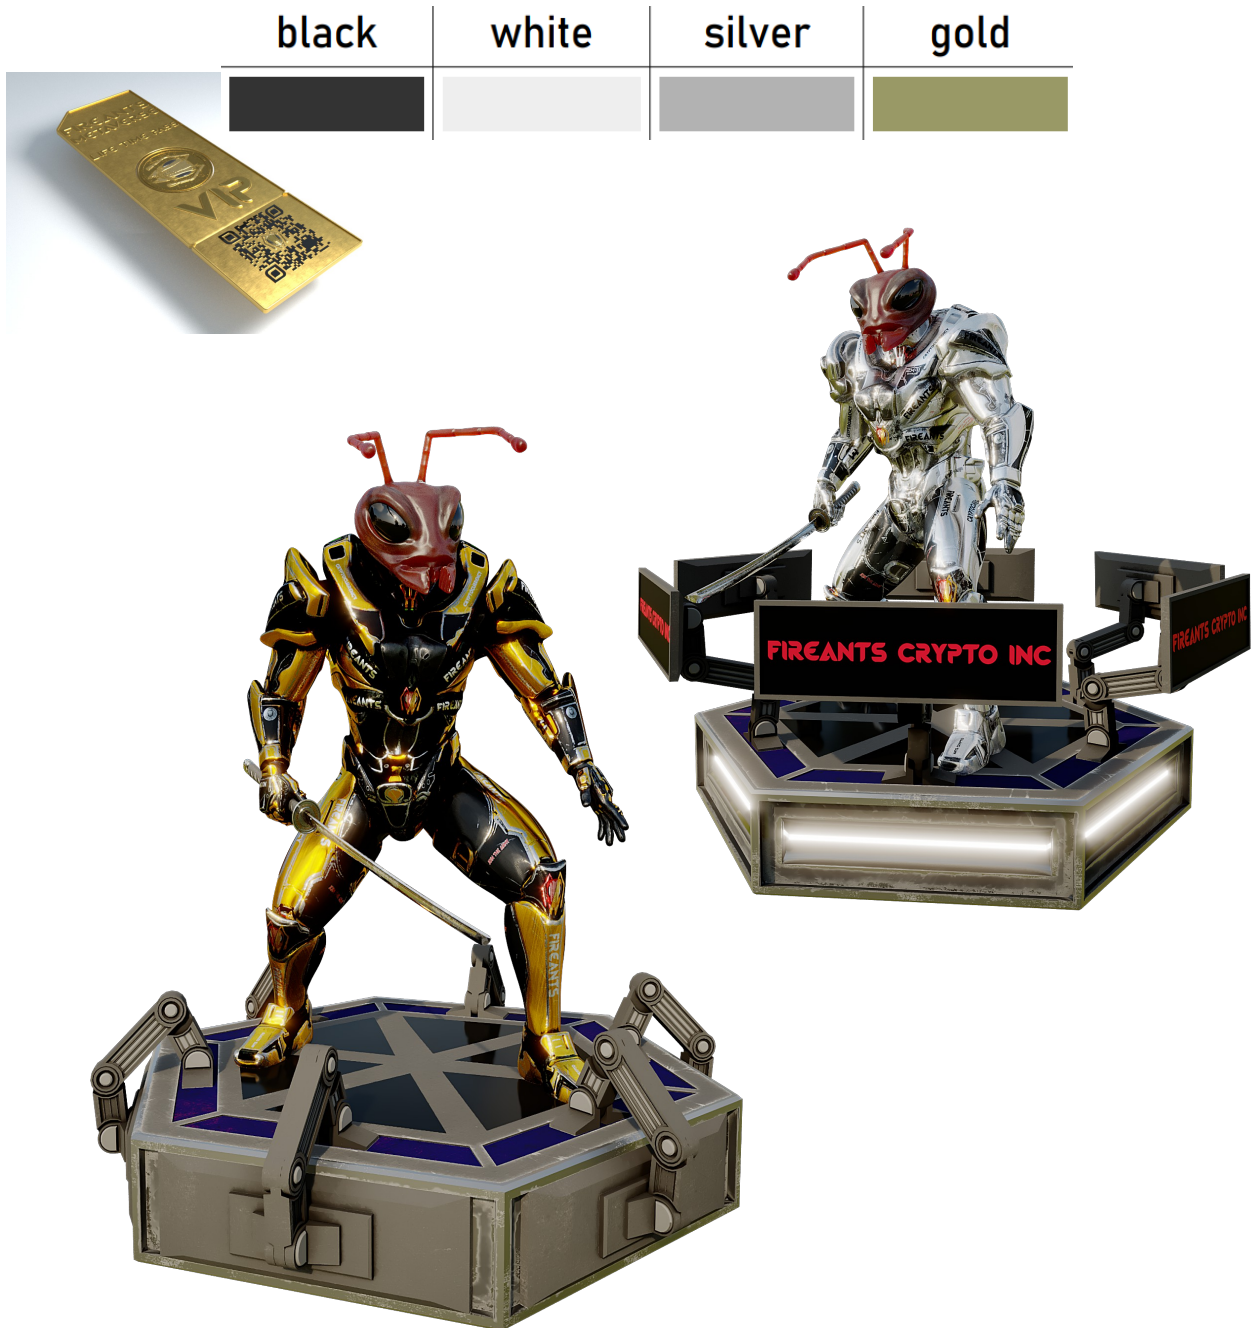

Each regular color NFT has its own district in the FireANTS metaverse.

yellow	orange	red	pink
			
purple	blue	mint	green
			

4 x special colors:

Each special color has its own district in the centre of the FireANTS metaverse.

Next to colors, the FireANTS NFT's come with lots of characteristics, items and equipment. The First batch of NFTs that will be released, are the "FireANTS Samurai": 360 unique handcrafted 3D art & metaverse ticket NFTs that allow VIP early access to the FireANTS metaverse!

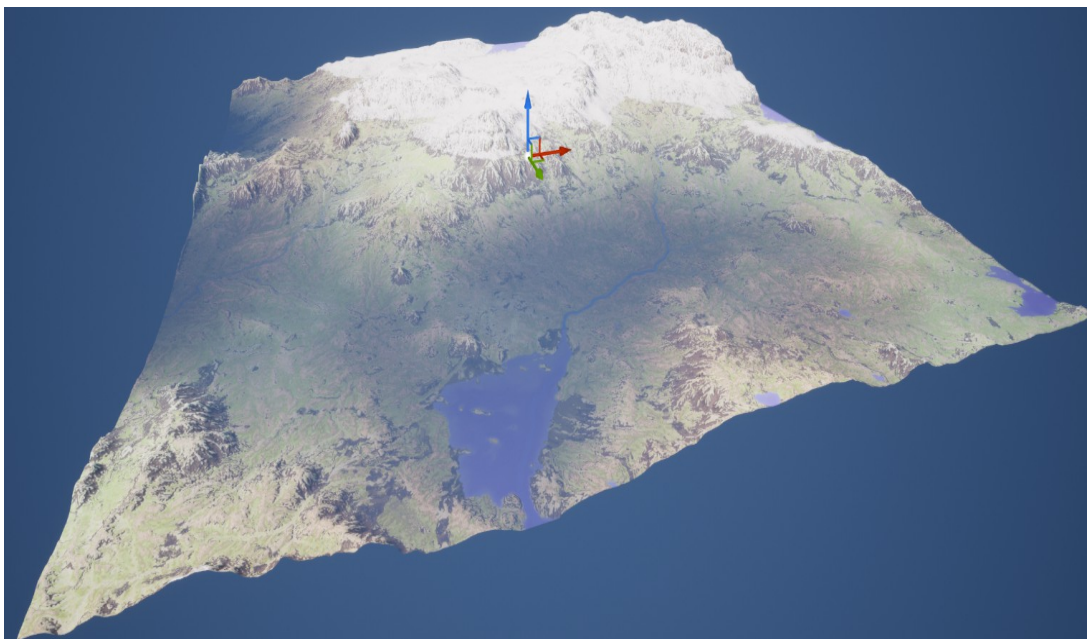

14 FireANTS Crypto Inc. Multiverse Development

FireANTS Crypto Inc., is going to take you on a journey into the future of virtual, interactive, and selective virtual reality. The metaverse product includes NFTs minted on the FireANTS blockchain. Let's take a virtual tour into the future of what FireANTS Crypto Inc. is involved with now!

Creating your own Avatar to begin your Virtual "You"

"Imagine stepping into a landscape of your own creation"

FireANTS Crypto Inc. can create any customized “Environment” you wish. We can even make it an eCommerce application where you can purchase entry, items or services!

Tribal-museum

Tribal-artefacs

As you get ready to enter one of many entrances to do your business, gaming, museum walk through, etc. You will approach each location/room with a password/card in order to enter securely. After entering your virtual world, you will have access to various terminals and portals to engage in activities of your choosing utilizing FireANTS assets for purchasing or access.

Use the ANTS-API-HUB to navigate through the FireANTS multiverse

You have at your fingertips the capacity to create virtual worlds through each individual terminal or room we create for you. In gaming, imagine you having different hubs to use for Slots, BlackJack, Roulette, etc. You can also enter virtual rooms for Private Events, Museums, Hall of Fame, all with interactive, activated media upon approach!

15 FireANTS Crypto Inc. Services

- Advanced virtual reality for your events, business space, NFT collections, museums, and many more.
- Secure private space with advanced encryption to protect user's privacy.
- Collaboration with people in real-time chat and group meeting.
- High definition 3D and animation using state of art realism technologies.
- Web3 integration dApp.
- Blockchain interoperability - Connect your project.
- Connection from real world to virtual reality interaction.
- FireANTS Avatar NFT integration, fully operable inside the metaverse
- Metaverse access to other spaces using control-based access and security policy.
- Marketing banners and ads available inside the metaverse.
- Ability to trade, sell, buy, & swap cryptocurrencies.
- Live terminals inside the metaverse to interact with websites.
(Create transactions to place orders, i.e, sport betting, online banking, Uber eats, etc.)
- The possibility is unlimited what we can be create!

16 The Directors Board of Advisors

The directors board of advisors are projects and persons of public interest that aim to improve social sovereignty and help to bring more fairness and equity to the future of humanity. Every scientific project is able to apply to the directors board of advisors, and will be supported by FireANTS. FireANTS Crypto, Inc. proudly presents their first advisors which are:

- Dr. Andrea C McAleenan, Ph. D.,
- Dr. Nicole Cochran, Ed. D., and
- Dr. Peng Wen, Ph. D.

[Directors Board](#)

Dr. Andrea C McAleenan, Ph. D.

Dr. McAleenan's career spans senior leadership positions in public and private higher education, K-12 and the not-for-profit sector. Her work encompasses academic and student affairs administration, graduate and undergraduate level teaching and advancement (fund and fund raising, major gift work, special events, marketing and communications, alumni relations). Bridge building, networking and partnership development are signature threads throughout her career. Dr. McAleenan began her career in public school counseling serving at-risk student populations in Michigan and Hawaii. Dr. McAleenan moved to the University of Hawaii where she designed system-wide admissions and articulation strategies for eight campuses. Her public higher education work continued at California State University, Northridge where she designed a university wide orientation and retention model.

Transitioning to private higher education, she co-founded a Masters Degree program in College Student Development serving as professor and department chair, prior to becoming the Dean of Instruction at Azusa Pacific University where she was responsible for accreditation, faculty development, enrollment management, and the Offices of the Registrar, Multiethnic Students, Learning Skills Center, Center for Personal and Career Development and Orientation. As part of a four-year Federal agency partnership, Dr. McAleenan moved to Communities in Schools based in Washington D.C. to establish integrated approaches for student retention in large urban school districts. Dr. McAleenan served as Director of Communications and Congressional Liaison prior to establishing and directing the Western Region's Center for Partnership Development and Training in Los Angeles. McAleenan joined the administration at the University of California, Los Angeles (UCLA) serving as Assistant Dean for the Executive and part-time MBA programs at the Anderson Graduate School of Management.

Identifying partners and coordinating international field study projects enabled her to work with many multinational companies including, NOKIA, SONY, BHP (Australia), AVL (Austria), SGS-THOMSON (France), New Zealand Enterprises, and DISNEY EUROPE. Dr. McAleenan founded UCLA's Global Partners Forum and became Associate Dean for International Relations, collaborating with business and government entities in 26 countries.

Dr. McAleenan was asked to join the Peter F. Drucker Graduate School of Management at Claremont Graduate University as Executive Director and Chief Operating Officer and later was appointed Dean of Executive and Extended Learning. Following that she served as Vice President for Advancement and Chief Development Officer for InterVarsity (Madison, WI)

where she designed comprehensive advancement, fund development, alumni and communication strategies for national and international constituencies. Dr. McAleenan returned to California as the Special Advisor to the President of Azusa Pacific University.

She focused on increasing the University's visibility and impact on national and international platforms including a creating a Global Think Tank for government, business and academia leaders from 45 countries at Lausanne's international gathering in Cape Town, South Africa.

Dr. McAleenan moved to the Central Valley of California where she was on the faculty of the School of Business at Fresno Pacific University teaching Global Management and Leadership in the MBA program. She also served as Director of External Relations and Partnership Development.

FireANTS Crypto, Inc. is pleased to welcome Dr. Andrea C. McAleenan Ph. D, and is proud to regularly donate ANTS coin and token to support her projects!

Dr. Nicole Cochran, Ed. D.

Dr. Cochran is talented in connecting with team members where trust is built, significant moments are shared, diverse perspectives are respected, and where communication and collaboration are common. With over 25 years working in education, non-profit and complex organizations as a director, professor, trainer and coordinator, her expertise lies in the practices of bias reduction, racial equity, diversity, and inclusion through a trauma informed lens while creating safe spaces for understanding and inclusivity. Her facilitation style has been described as engaging, and honest with a dash of humor. This allows her to create connected groups through courageous, and at times, uncomfortable conversations.

She has led workshops, professional development seminars, and community conversations to tear down walls and build bridges of understanding and connection. She is certified in Restorative Justice practices, and has a unique ability to collaborate with diverse, resistant, and combative groups. As a maximizer, Dr. Cochran is skillful at placing people in positions to leverage their strengths and abilities. Moreover, she has a talent for creating simple and reliable accountability markers through consistent evaluation and feedback.

What sets her apart from most leaders is the ability to serve others while meeting and effectively going beyond the requirements and expectations of the organization. Supervising programs provided Dr. Cochran with unique insight for working with people across intersecting lines for better collaboration, respect, and opportunities for change. Over her years of

research and practice she discovered that innovative and thriving programs are developed in community. She has a proven success rate and can attest to the power of mentoring, community, stakeholder support and encouragement to spark the desire for individuals to flourish beyond difficult circumstances. Dr. Cochran has been an advocate for social justice and social change for many years. She volunteers in communities that struggle with safety and poverty. Her desire is to advocate for the marginalized and support them where they are, whether it is unemployment, homelessness, youth equity in education, or fighting for justice. Her passion is people and serving them.

FireANTS Crypto, Inc. is pleased to welcome Dr. Nicole Cochran Ed. D., and is proud to regularly donate ANTS coin and token to support her projects!

Dr. Peng Wen, Ph. D.

Raised in rural Taiwan in a non-Christian family, Dr. Peng Wen Ph. D., who retired in July 2019 as professor of business administration and economics, and director of the MBA program, came to the U.S. in 1985 to earn his MBA at the University of Oklahoma City and PhD of Economics at the University of Florida. When he just arrived the US, he joined a Bible study to help his English proficiency and learned more than he bargained for. "To practice English conversation, you have to ask questions, to ask questions you have to read ahead," he says. Wen made his confession of faith four months later. An ad in the Chronicle of Higher Education brought Fresno Pacific to Dr. Wen's attention while he was finishing his Ph. D. at the University of Florida at Gainesville. He came in 1990, looking for a place to share his faith through teaching economics and finance. "When this job was offered to me I said, 'Perfect,'" he says. There have been offers since he was tempted by one from financial giant Goldman Sachs. "I prayed about it and realized that's not about mission, that's about the material," he says.

In 2019 Dr. Peng Wen Ph. D. started to go to China to train church leaders. He will continue at Bethany church Chinese Fellowship until he trains a successor, then plant more churches in mainland China and Taiwan. As he told Christian Leader magazine: "When I confessed my sins to Jesus, I said: "I don't desire just to know you, I desire to make you known." Mission drives Dr. Peng Wen Ph. D. "God calls me to start a church wherever I am," he says, including one in Gainesville and the Chinese Fellowship at Bethany Church, Fresno.

FireANTS Crypto Inc. is pleased to welcome Dr. Peng Wen Ph. D., and proud to regularly donate ANTS coin and token to support his projects!

17 What are the Professionals saying?

Chad Dixson, MIS/Network Manager

Arizona Yavapai Prescott Indian Tribe

“Using FireANTS Crypto as a payment system is the future of DeFi. It will be the technology for tribes and merchants across the U.S. that will soon have to adopt. It eliminates the middleman additional cost of transaction fee, tax and its secure”

Eddie Chavez, IT Director

Minnesota Bois Forte Band of Chippewa

“With Web3, Metaverse and FireANTS, blockchain will help tribes secure and expand its technology innovation for the future”

Edward Rangel, IT Director of Operation

Mississippi Choctaw Tribe Peral River Casino

“FireANTS Crypto NFTs & Metaverse to secure tribal cultural preservation for eternity is the next big innovation for tribes”

Eric Armstrong, Information Technology Director

Washington Sauk-Suiattle Indian Tribe

“FireANTS Crypto metaverse for tribe is going to be the next big break through innovation for Native American tribe to secure their digital assets in their own virtual reality space”

Rob Crider, Interim CTO

California Tachi Yokut Tribe

“FireANTS Crypto NFTs is going to be the next big innovation adoption for tribes. Secure digital tribal arts, languages, music and preserve historical documents for eternity”

18 FireANTS Crypto Inc. Roadmap

Year 2020

Q2 Creation of ANTS ERC20 Token:

Introduction of FireANTS through social media.

Q3 Social Media Program:

TIP-bot integration to tipcc and Tippy.

Discord / Telegram / Twitter / Facebook/ Instagram / Medium.

Q3 Exchanges:

Decentralized exchanges: Uniswap / Forkdelta and Bamboorelay.

Centralized exchange: unnamed.exchange

Q4 Airdrops:

Start of ERC20 token Airdrops on Discord.

Year 2021

Q1 FireANTS Blockchain: [FireANTS](#)

FireANTS are happy to announce their own Proof of Work / Proof of Stake blockchain.

Q2 Marketing Strategy:

Strategical meeting for the extension of the FireANTS usecase.

Updates of website and whitepaper.

Q3 FireANTS Cypto Research USA:

FireANTS Cypto Research // Office in US-Lemoore, CA. 93245

339 West D Street Suite 1

Q3 Introducing FireANTS USA:

Introducing FireANTS to United State Native Americans Tribes in California Central Valley (6 Tribes).

Q4 Move the Binance Smart Chain

[Wrapping-service](#) for ANTS coin, and issuing redFireAnts rANTS BEP-20 token to move the ANTS ERC-20 token by processing to BSC.

Year 2022

Q1 FireANTS Corporation, NFTs & Smart Contract:

Registration of [FireANTS Crypto, Inc.](#) a Delaware C-Corporation, with a foreign corporation registered in Nevada.

FireANTS NFTs & Smart Contract for securing proprietary laws and self-gov. documents. Strategic analysis for Asia and Australia.

Q2 FireANTS Smart Contract:

FireAnts Smart Contract: Child Trust Fund 1 month – 18 Years

Q3 Smart Contract for Tribal Member:

FireANTS Smart Contract for Tribal Member PerCapita & Bonus.

Southeast Asia FireANTS office expansion – Singapore, Laos.

Q4 Research & Development FireANTS:

FireANTS in business enterprises, stores, gas stations and restaurants.

ANTS coin & rANTS token in Casinos. Exchange of FireANTS with ATM and Scanners.

Year 2023

Q1 Testing POS / Mobile hardware:

Testing POS / Mobile hardware peripherals scanners QR codes process redFireANTS token & ANTS coin on business level.

Q2 Deploy hardware scanner:

Deployment of hardware scanner into tribal business entity to process method of payment redFireAnts rANTS token & ANTS coin.

Q3 Update new Web & App:

Update new Web & App. iOS & Android Wallet to increase security & stability for use in Tribal Governments.

Q4 Audit and Security:

Audit and security check redFireAnts Smart Contract using Certik Security 2021 Q3 partner. [Certik-certificate](#)

Year 2024

Q1 Introducing to Native Americans Tribes:

Introducing FireANTS to United State Native Americans Tribes in Arizona, Washington State, Minnesota, and Mississippi. Introduction to FireANTS Private Blockchain & Smart Contracts

Q2 Integration and adoption with Native Tribes:

Continue to work on FireANTS integration and adoption with Native Tribes. Smart Contracts as well as Mobile Scanner and ATM.

Q3 FireANTS Trade Shows:

FireAnts are present at the following Trade Shows: Rez Trade Show / NIGA Show / TribalNET Conference / U.S and European Cryptocurrency shows.

Q4 Assistance of rural area Tribes with technology:

Assist rural area tribes with technology consulting, high-speed internet, broadband, Mobility and ATM placement for the unbanked tribes.

Year 2025

Q1 Assist Tribe Deploy FireAnts Blockchain for Governement:

Assist Tribe Deploy FireANTS Blockchain for their government needs. Usage FireANTS coin and rANTS token as a bridge to swap with other cryptocurrencies.

Q2 Meeting with more Tribal Leaders:

Meetings with more Tribal Leaders across the United States to bring Fire ANTS adoption to Native American Tribes and into their Government and business enterprise.

Q3 Continue to support Native Tribe with technology:

Continue to support Native Tribe with technology challenges with highspeed internet broadband (wired /or Wireless PtP /PtMP).

Q4 Assist Tribe with Workforce Development:

Assist Tribes with Workforce Development in technology and education, work with tribal leaders to create sustainable ISP for Tribes by using the FireANTS blockchain.

19 Wallet Overview FireAnts Coin

[Investors](#) Coins for sale. you all can buy it

[Liquidity](#) Coins will be locked later in some special pools

[Security](#) Coins for usage in later security projects

[Marketing](#) Coins for usage in marketing projects, rains/drops/live events
